## PROFESSIONAL PROFILE

---

UX Designer | Product Designer | UX Researcher | User-Centered Design | Accessibility Enthusiast |  
Experience with B2B - B2C - SaaS | Strategic Design | Claude AI - Figma Make |

I am a Product Designer focused on creating clear, functional, and user-centered digital experiences that solve real problems and bring value to users and the business. I work from user research and understanding to the definition of flows and interfaces, collaborating closely with product and development teams to transform complex ideas into simple and scalable solutions. Constantly learning new methodologies and tools, I seek to continue growing as a Product Designer in projects where design has a strategic and real impact.

## EXPERIENCE

---

### Payana

#### Senior Product Designer

May 2024 – Present

- Analyze flows and identify optimization opportunities in products related to billing and payment add-ons.
- Define and document functional requirements, collaborating with product and technology teams for their implementation.
- Drive improvements based on user feedback and data analysis, prioritizing impact and operational efficiency.
- Participate in the creation of automated solutions (including AI use) to optimize processes and user communication.
- Lead UX improvement initiatives for SaaS products focused on payment management, billing flows, and automated financial processes.
- Use AI tools such as Claude, Figma Make, or Lovable to efficiently create faster prototypes.

### Litebox

#### UX Designer

May 2022 – Abr 2024

- Worked with different types of businesses according to our clients' needs.
- Developed a strong business understanding thanks to the close relationship I had with managers.
- Developed successful products for countries like the USA, Spain, and India.

### Banco Galicia

#### SSr. Product Designer

Nov 2021 – Abr 2022

- Worked as Focal for the Retail Banking Onboarding team to improve the design of the bank's main page.
- Implemented Scrum techniques to improve team communication and workflow to achieve company objectives in a timely manner.
- Maintenance of Design System order and consistency.
